22nd annual

PRODUCTION sale

GENERAL INFORMATION

SALE LOCATION:

Stockmen's West Livestock
Dickinson, ND | 701-225-8145

SALE DAY PHONE:

701-225-8145
701-260-2579 (Rusty) | 701-260-8277 (Arthur)

PRE-SALE INSPECTION:

Bulls can be viewed at Ridl farms prior to February 27th and at sale barn thereafter. The bulls will be penned east of the original pens under the lean-to in the 700 alley in bigger pens to have more room.

HEALTH:

All bulls have been given 7 way Somnus, foot rot vaccine, Pinkeye vaccine, and Vista 5 and poured. Health papers will be furnished for bulls going out of state. All bulls selling have passed a complete breeding soundness exam and are guaranteed to be breeders.

SEMEN INTEREST:

Ridl Angus has the right to retain 1/3 semen interest in any bulls sold.

GENETIC DEFECTS:

All bulls selling are free of any known genetic defects by pedigree or test.

MAIL BIDS:

Anyone unable to attend the sale may call or send bids to any of the owners, ringmen, auctioneer or new this year bid online at www.dvauction.com

DELIVERY:

Haul your bull home sale day and receive a 75\$ per head discount. Ridl Angus will offer free delivery on bulls within 300 miles from the farm and delivery will take place promptly after the sale. Unless other arrangements are made.

BREEDING GUARANTEE

A 60-day breeding season guarantee will be offered on any bulls selling over \$3000 or more. This will cover any injury that would keep them from being a breeder for the first season. This does not cover injury that occurs prior to breeding season at Ridl Angus or at the purchaser's ranch. If a problem occurs, we will provide a suitable replacement if one is available or you will receive full credit, minus \$2000, towards a purchase in next year's sale. This guarantee does not cover death as death is insurable. Injury or death prior to delivery or pickup is not the responsibility of Ridl Angus, also insurable. All bulls will pass a breeding soundness exam performed by a veterinarian. Bulls are guaranteed to be sound breeders.

FEEDING ARRANGEMENTS:

We will "feed 'em till you need 'em" at no extra cost. Bulls returning to Ridl Farms for wintering will be handled and cared for as if they were our own but are the property of the buyer with the buyer taking all risk and responsibility promptly after the sale. Ridl Angus will not be responsible for bulls if injury occurs. Injury is an insurable risk and Ridl Angus will not be held responsible for any injury. We highly suggest insuring all bulls. Bulls wintered at Ridl Farms are to be picked up at the farm. Please call ahead to make loading arrangements.

TERMS:

Bulls sell under the terms and conditions of the American Angus Association. Terms are available at www.angus.org

LUNCH:

FREE BEEF LUNCH STARTS AT 12:00

RIDL **ANGUS** **DICKINSON, ND**

Cattlemen

It is my pleasure to welcome you to our 24 annual production sale. The sale will be held Tuesday March 2nd at 2:00MDT or after the stock cow sale. We will be offering 76 yearling Angus bulls sired by some of the top genetics in the angus breed. The sale will be broadcast live on DV Auction.

It is our goal to produce good, high quality, high volume, growthy cattle with high maternal traits and good dispositions. The bulls are raised on mothers' milk and grass alone, no creep feed. The bulls were weaned on September 25th and started slowly on chopped hay, silage, and distillers grain. We slowly added corn and wheat midds and took the distillers away to achieve a 3.5lb per day gain. Bringing the bulls along slowly helps ensure longevity and breeding soundness.

Majority of the bulls have DNA enhanced EPDs through the Angus GS profile. The bulls are freeze branded and will pass a breeding soundness exam prior to the sale. Again, this year like always we offer the same feeding arrangements as we always have, or we will be happy to deliver your bull. We also offer a \$75 per bull discount if you take your purchases home sale day. Videos will be available the middle of February at www.dvauction.com

We look forward to working with you and feel free to call with any questions or stop out and go through the bulls. We will pen the bulls in the larger pens in the 700 alley at the sale barn again. Check out our website for more information or updates,

Thankyou
Ridl Angus

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	28	Milk	33
Birth Weight	21	Mature Weight	11
Weaning Weight	26	Mature Height	8
Yearling Weight	21	Carcass Weight	9
Dry Matter Intake	8	Yearling Height	11
Scrotal Circumference	13	Carcass Marbling	9
Docility	10	Carcass Ribeye	12
Heifer Pregnancy	14	Carcass Fat	10

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs

www.angus.org

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

- Roughrider just doesn't seem to miss, this year's calf crop is the largest and most impressive. He stamps them in their style and profile while adding top and performance. The first daughters we calved last year we very quiet and possessed great udders and performed very well ratioing 105 at weaning. Roughrider has left a great impact on our heard and will continue to through AI and the use of the popular AI sire Roosevelt who was the high selling son in our 2019 sale selling to Krebs Ranch in Nebraska.

- Suitable for use on heifers

We would like to extend a special thanks to Rusty's Father-in-Law, Jeff Zaske. Jeff always makes himself available to come over and help with anything we ask of him, from hauling hay, breeding projects, adding on to our calving barn, freeze branding, whatever it is he is happy to help. He also houses our herd bulls. It is greatly appreciated.

- Stats was the co-high selling bull in the 2021 Mohnen Angus bull sale. Stats is one of the great young calving ease sires that will sell anywhere in the 2021 bull sale season . His overall performance combined with his EPD profile, excellent disposition and great feet and legs was hard to find a fault. Look for Stats sons to headline our 2023 bull sale. Owned with Richard Angus and Zimbleman Cattle company.
